

2010 Annual International Event
ICT-Enabled Sustainability in Smart Cities

Developing SmarterMalta: the Next Generation of ICT Applications

Wednesday 3rd March 2009
Le Meridien, St Julians Malta

A photograph of a telecommunications tower on a hillside. A worker in a hard hat and safety vest is walking on a dirt path. The hillside is covered in dry, brown grass. Two satellite dishes are visible on the hillside. The sky is blue with some clouds.

the context of smart

The development of Smarter Malta

The past is the mirror on which the future is projected

Digitisation and liberalisation of telecommunications

ICT Strategies and the advent of the knowledge worker

cliché or sustained vision

The SmartIsland Vision and Strategy

“a model strategy to be followed by all leading nations” – IBM SVP

“vision is the art of seeing what is invisible to the others”

“the most pathetic person in the world is someone who has sight by has no vision”

a matter of philosophy

Aggregating into a system of systems

Interconnected mentality for Positive Transformation

Sustainable competitiveness and the creation of high-value jobs

Innovation - Competition - Knowledge

building a SmarterMalta

**Facing unprecedented
challenges**

**Application of Core
Systems driven by
Business Outcomes**

Public Service Agent

**E-Government Service
Broker**

Next-Generation Classroom

**Delivering Patient Data to
the Patient**

critical success factors

Avoiding complacency at all costs

Addressing our vulnerabilities:

- International connectivity
- Internal market
- Human resource supply

Ubiquitous high-speed open-access communication is the quantum leap of our economic value chain

Developing SmarterMalta: the Next Generation of ICT Applications

THANK YOU
